### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-6, 8 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hall, Jr.

Hall, Jr. Discloses a spray head comprising a body 10/30; sidewall ports 28; proximate port 46; distal port 14; interior ports to second water channels 20/22/24/26, wherein each of the secondary channels has a first turn greater than 70 degrees to the sidewall ports; a first channel 68; and a cavity 18. See Figure 1.

As to claim 24, it is inherent that the first water velocity through the proximate port 46 will be greater than the second water velocity through the sidewall ports due to the increased number of ports which reduces the flow pressure due to friction loss through the number of ports.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hall, Jr.

Hall, Jr. discloses all the featured elements of the instant invention except for the particular cross section of the secondary channels. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the various cross sections as claimed since such a modification is merely the substitution of one cross section for another and the apparatus of Hall, Jr. would perform equally as well with any of the claimed secondary cross sections.

***Allowable Subject Matter***

5. Claims 12-23 are allowed.
6. Claims 2, 7 and 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hsu, Huang, Ogi and Hunter show various types of sprinkler heads.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is 571-272-4899. The examiner can normally be reached on 7:00-5:00; M, Tu, W and Th.
